## Investment Objective and Strategy

The "AQAM Resilient Assets Strategy" invests your assets in hard currencies and sustains true values predominantly outside the Eurozone. Currently, preferred currencies are CHF, DKK, NOK, SEK, and USD. The objective is to increase your assets in real terms over the course of an economic cycle. For this purpose, instruments such as shares, bonds, active funds, ETFs, ETCs, precious metals, and alternative investments can be used. For active loss limitation and to avoid higher Maximum Drawdowns, there is a discretionary and tactical Risk-Overlay added. For this purpose, 2x short ETFs on broad share indices and bond indices are used. The upper limit for commodities and alternative investments is a maximum of 50% of the portfolio. The 3% benchmark and the high watermark serve to focus on your real added value!
